2 Introduction

In April 2024, the LISS panel¹ completed a questionnaire on work and schooling, as part of the LISS Core Study. The survey was repeated in May 2024 for panel members that did not complete the questionnaire in April.

The questionnaire was presented to 7,490 panel members, of which 5,564 completed the questionnaire (response percentage 74.3%).

For each part of this questionnaire, the data are collected in two months of field work. At the time of data collection for this wave, new panel members were being recruited to the LISS panel. The panel members who joined the panel during the first fieldwork month couldn't participate in the first fieldwork month and were therefore selected for the second fieldwork month.

This survey is repeated every year.

3 Codebook

This codebook contains the questionnaire as administered to the LISS panel.

- Variable names: The variable names are printed in bold and correspond to the names in the dataset.
- The questionnaire routing is printed in bold and colored blue for each variable concerned.
 - = means "is equal to"
 - != means "is not equal to"
 - <= means "smaller or equal to"
 - >= means "larger or equal to"
- If there were buttons on a page for "I don't know", "I refuse to say" or "Not applicable", this will be indicated at the top at "Page" (when the button is clicked, the corresponding value is written to all variables that were present on the page)
- text: answer box (no limit to the length of the answer).
- string: answer box allowing a certain number of characters (standard is 255).
- empty: questions could be left unanswered
- Numerical variables: If ranges were used, these are printed in italics in the codebook if the respondent could not see them on the screen. If the respondent was able to see the ranges, the variables are printed in normal letter. Integer: If a question is not subject to any limit (integer), no range is indicated.
- 'Fills' (variable text) are given between straight brackets [].
- Variables in between curly brackets {} are not part of the dataset, but the corresponding questions or text were part of the questionnaire.

The following questions are about your [schooling and training in relation to work] you will possibly recognize them from last year's questionnaire.

If you participated last year, you will see that the answers that you gave then are filled out already. Of course your situation might have changed since then. In this case you can change your answer.

Each year you will receive the questionnaire again. In this way we can measure changes over time.

The auxiliary variable below indicates whether the case refers to a person who once worked but has now been unemployed for at least four years, or to a person who is a student of at most 26 years of age and not working for the time being, but who worked in the past. This variable is used in the routing to cancel out a number of questions for these two groups. It holds that cw24q522 equals 1 if one of the following conditions holds:

(cw24q319 > 1900 and cw24q319 < (2022-4)) or (cw24q003 <= 26 and cw24q095 = 1 and (cw24q089 = 1 or cw24q091 = 1 or cw24q092 = 1 or cw24q103 = 1)).

Do you provide informal care?

Informal care is care provided to chronically ill, handicapped or needy persons by close relations such as: family members, friends, acquaintances and neighbors. Informal care is typified by the previously existing personal tie between the care giver and receiver. The care provided can be household care, personal care, or administrative help. Informal care is typically also long-lasting care without payment.
